...one last thing. I'm not sure, but going on Dell's website they say 4300s have 1 4x/2x AGP slot. Will a Radeon 9700 work in a 4x AGP slot? It also didn't say AGP slot, but AGP protocol bus or something.

<http://support.dell.com/support/edocs/systems/dim4300/specs.htm#1101572>

Will a Radeon 9700 Pro 128 Mb fit in this? Thanks so much for your continued support.
