Bearxorlf you live in any of these states, using the Internet could well soon be illegal.

There are laws being proposed in each and every one of these states that would prohibit:
"To conceal or assist another to conceal from any communication service provider or from any lawful authority, the existence or place of origin or of destination of any communication" (SC Bill)

No... Using the internet won't be illegal. Either you're misquoting a site, quoting a misinformed site, or not quoting the entire thing. What site did you get that from?
