What resolution are you playing at? 1024x768 should be plenty, I get 20-30 at this res, with maxed out effects and eye-candy. Bear in mind this is on a 256k cable modem connected to a AthlonXP 1800+ with 384 of DDR and a PCI Geforce 4 MX 420w/64mb of VRAM. I usually play(I say usually I haven't been able to for quite a while) on 20v20 servers with Custom Maps.
