Silent Kane You shouldn't call the wrong persons "MORON" before things you don't like start to happen.

A LOT WORSE things will happen if things start to happen that I don't want.

Regardless, there is no point in continuing, your patch did not work, mine did. Get over it. End of story, you want to impress? fix udp flood. Untill then your just some random scrub in my book :rolleyes:

k thx bye
