When you install renguard on your server it makes a file called "ssc_ignore.txt" you put names of all the ppl that you want renguard to ignore in that file. So the ppl on that list can cheat all they want and renguard won't do anything to stop them.
I think ssc_ignore.txt souldn't of been a part of renguard and kind of sux that it let's he host and his/her friend cheat all thay want on that server.
