
Subject: HUGE BRENBOT PROBLEM!!!!

Posted by [zunnie](#) on Tue, 20 Jul 2004 00:02:27 GMT

[View Forum Message](#) <> [Reply to Message](#)

Goto your startmenu and choose Run:

C:\Windows\System32\cmd.exe [enter]

A command prompt will popup, change to the directory where brenbot is installed.
To 'browse' and then start brenbot:

This 'should' happen:

If anything goes wrong it will be displayed on that screen.

There is also a tutorial written by me, you can download it [HERE](#)

You can view the tutorial [HERE](#) with Internet Explorer for example but the pictures dont work anymore.

For working pictures you should download the rar archive mentioned earlier until i put the tutorial on the fanmaps website again.

I hope this helps
