YSLMuffinsAlkalineFanMaps CrazyCTF has something like this. If you are on gdi and buy a engine you will spawn as a nod engine with a PIC that shoots Oblisk shoots similiarly the shotgun trooper has a AGT missile launcher.

Not to mention the sbh has low gravity and can jump pretty high, all the hero chars for both sides have been swapped, so if your on nod and buy a sakura you actually spawn as havoc.

That sounds stupid, lol...

its actually pretty fun and plays the role of its name, "crazy"

anyway I think everyone should check it out just to fool around in it.
