mahkra3 - The wrench pictured has a rubber grip, but I contend that it is unrealistic to use that wrench as your model. The wrench in the picture is too modern for RA, and I think it wastes too much rubber for it to be used in wartime.

3 The grip should NOT be rubber; it should just be metal with a grippy texture. Even today, most wrenches have metal grips rather than rubber, and RenAlert is supposed to be set decades ago. Also, during wartimes, rubber is a VERY important commodity, so I find it incredibly unrealistic that it would be wasted on a wrench grip.

Yes, but you see, it's an alternate reality.
