Oh...

You have to download and install Gmax first. Renx is a gamepack (think plugin) for Gmax, it must have Gmax installed to work.

Go to the Discreet Gmax site (<http://www.discreet.com/products/gmax/>) and click on the blue "Download Now" link on the left, scroll down to where it says:"gmax 1.2 Installer [19MB] " and download it from one of the links under it. Install it, than register it (doesn't cost anything btw), than install the renx game pack (follow the instructions)
