If you had bothered to go to the server you would've seen that you aren't banned. I took a look at the site and everything a while ago and decided against it, I know I'm very harsh with banning, not as much as I used to be, I just want the server clean of everything that poses a threat to it. For all I know you could've been lying this whole time and went to my server had some site that let you download aimbots with trojans in them, and to be perfectly honest I get one too many newbs and n00bs in my server that would go to that link, and I don't want that. I wouldn't be so harsh if I got a decent crowd that I could trust so I don't have to spend a few hours a day keeping n00bs off my servers with scripts and general kicking, I only have 3-4 moderators to help me, they do a great job, but moderating isn't their job that they get paid for. What I'm trying to say is the safety of my server and the players is what I really care about. And every kick ban I make is in their best interest. Hell, I even had a corrupt moderator that kicked for the dumbest reasons like ping of 300. So yeah, I have to be careful. Though I don't really 100% forgive you for making that site. But it was the past, and that's all it will be, and I have to realize that.

EDIT: Though we all know there are aimbots snipe, gear your site more to the statement every bot I was ever given either sucked or didn't work so don't bother, or just even delete that page.
