I had a fun game with bots once with a mod that creates a ton of Mendoza and Raveshaw bots whenever you buy a NOD vehicle, and they all follow you around. So I lead about 100 or so of them over to the GDI base, and switched teams, at which point it took me about 10 minutes to clean out the base, where I died many times. it was fun though, but when I came out of a building the first time, they were all fanned out around the base, and the screen just filled with beam shots.
