Majiin VegetaJavaxcxl fail to see the point of having an alternate firing mode for the repair-gun when the pistol already is a powerhouse in a small package. I don't think many people appreciate how dangerous the pistol actually is.

^

no need to unbalance the game becuae people cant aim with a pistol

This is kinda funny because I am one of the people that can't aim with a pistol (or a ramjet, shotgun, etc). The one thing I can aim with is the "blue beam of death" because buildings don't move!!!

Note to self...Find a way to uninstall Gizbotvas' misbot
