well, seeming that the renalert forums are down, due to connection overload (yes lots of people trying to get on there) you cannot access that link, so here is the direct link to get it.

first link is the ful installer like 300+mb or whatever, so you do not need 991->9925 to install it, and for people who already have the other patches, get the second link, its about 120+mb...

here it is!!
