I'll put it up on my site and tell whoever it is on the RenAlert site I need to tell to get up there when it's finished. It will be slow, but normal for 56kers. Argh, why couldn't you have delayed .993 Untill I get a paid server for my site . . . I can't wait to test this!

Ok, I got the patch file up on my site here . . .
http://egames.servegame.com/DownLoadFiles/RenAlert/misc/RenAlert_9930_patch.exe

Still downloading the full installer though.
