Ohhh, you run a server, my bad . . . . sorry, I get why your asking for money now, I didn't see that you had a server. Sorry bout that . . . So you are using a free server for your site, that's cool that it's also ad free, very few like that. Have you taken a look at phpBB for your forums instead of Invision? I personally like phpBB much better and it is more user friendly and much more flexible and modable (LOL, it that a word?) I think you should use phpBB instead of invision, but that's your decision, just wanted to let ya know what I thought, again Sorry bout before, I didn't know you ran a server.
