---

I redownloaded brenbot. I uninstalled and reinstalled FDS and even Renegade.  
I tried different ports...4848 4849 4547 5001...changed in both server.ini and brenbot.cfg  
I turned off my firewall (the one built in XP) Nothing. I called my ISP and seen if they had any  
blocked they said no, and they didn't know why it wouldn't allow.  
It still has the same error..  
IRC:disconnet detected...reconnecting in 60 sec...  
socket: OI::Socket::INET: Bad protocal "udp" at script/brenbot.pl line 1634

Is there anything else I can try? I don't want to give up on it yet!
