Make regularly backup-copies of the original file.

Im not busy on a map or anything but i use this for the server side modified ws maps.

Maybe BHS can make a patch for LE, should ask SilentKane or Jonwil about it i guess.

BTW: Once you finish your map, or release a beta version, would it be cool if i can see the map then? And (if its a balanced map) put it on the downloadpages of the FanMaps site? (www.FanMaps.net) ?? Would be ace
