mIRC problem - when brenbot boots up and goes to IRC, it says blah blah repaorting for duty. then it says tpye !help for commands. when i type !help in IRC it doesnt do anything. and no commands will work for IRC at all! !msg wotn work nothin will! that stuff only works in-game! help me!

mod problem - ok i made mods on my server, and im one of them, and when mods join they have to auth there name in IRC or they get kicked! since i have IRC and i can auth quickly then, its no problem for me BUT ITS ANNOYING, how can i turn off the u must auth with the server in 60 seconds or kick? plse help me!
