hum sound interesting but as said before... good luck.

Far sight will be something to do.. since we cant add extra sniper view.. you can only stick to one sniper sight (Falcon2 (scoped), sniper rifle, farsight...) so good luck with these. Even worse... Magnum LX and Calisto NTG high impact shell that pass through doors (not other gun bullets.. except far sight).... Dont forget dragon(but this one may be possible), Fly-by Slayer Rocket... Auto-aim Mag 20, Treaths detector....

There is a bunch of stuff that you wont be able to do.. but for standard combat using some option of each gun.. sound good anyway

and yea i was a GE/PD fan.. and i was waiting for PDZ!!!! damn that is very sad that Rare got bought by microsoft and... no more PDZ...
