You always seem to take the point of the topic and change it just a bit to make the other party look bad.

Yes, if he were to release the code, we would all be grateful for it. That's the whole point of this argument: not sharing. If jonwil decided not to share his scripts.dll stuff, your mod wouldn't be what it is today, at least it would be x months behind schedule. He has code that can very much change the course of possibilities this game has to offer, but his refusal to give anyone the chance to make that change marks him as an asshole in everyone else's eyes.

If you are going to take the time to show off your work, then give people a chance to use it. Even if you give it to one other person outside the parties you are affiliated with, it could make a good difference.

On a side note: I find it funny how you are the only one defending him, ACK. That whole "opposites attract" thing has nothing on you two.
