We never needed Scripts.dll to do the base work we have. All the "extra" things are what Scripts.dll is necessary for. Even if JW didn't do it, SK wasn't that far behind in making it work.

I don't care if you think of him as an asshole, that's pretty irrelevant since you're never going to get anything from him if you're going to whine and complain that you didn't get anything to begin with. Beggars can't be choosers, and demanding something from someone with no compensation usually makes them want to tell you to fuck off.

Pi, there's a huge difference between "asking" for something and "whining" about it.

Example:

"Silent Kane, could you please consider releasing your code? We would all appreciate it."

^ Ding ding...

"Silent Kane, you're a fuckhead because you don't want to give it to us. We all deserve it but you're an asshole who thinks you're better than everyone because you won't give out code."

^ BZZZZZZZZZZT..
