The "battle" in the forums today called for quick action, and he ran off to sleep right in the middle of things, so we didn't have much choice. We gave him several chances, and I even spent \$100 of my own money to "bribe" him to cooperate... but he couldn't cooperate. We don't feel such actions are a good reflection on our team at BHS, and we were sick of him starting and never finishing every project under the sun except for our own. There is no doubt in my mind that you would all be playing with CP1 already if it weren't for his intentional delaying.

He is a really, really talented coder, but when he's holding up everything and everyone and not actually doing much coding for BHS, we just can't have him on the team. Scorpio and jonwil will need a couple weeks to recreate all the scripts, but we'll get them to you.
