PiMuRhoGiven that I can XT PEs for less than a Pro, I'll stick with the XT, thanks.

if you get a 40% discount, then x800 pro would cost 239 (based off 399 retail) :rolleyes:

Then you also said:
Alkaline wrote:
Get a X800 pro VIVO card. Its the same card has the XT PE. ALl you need to do is download the gigabyte bios and flash it. Violla its now a X800 XT card.

For 450 its the best card for the money.

Quote:Except it doesn't work on all cards, and it still doesn't give you the extra texture pipelines that the XT has.

WRONG, works on all x800 pro vivo cards :rolleyes:

In conclusion X800 pro VIVO is the best card to buy for the money, its retail is 450, so even developers can get the card for 270.

I'm sure your going to reply with some sily thing claiming how developers can only buy XT cards :rolleyes:
