I KNEW I REMEMBERED IT FROM SOMEWHERE!

Jesus christ! He stole from the number one CS gunshop there is ...

I mean I used to be buddy-buddy (well a bit atleast) with a few of the staff there even in my CS days, I used to use loads of their replacements since they ruled so much, how in the hell could I not have noticed that!

Seriously, I've never been an active one to publicly denounce stealzer studios or whatever, but I mean seriously ... how could you be so fucking lame, that's like you took the Renegade Buggy and called it your own without changing even ONE LITTLE THING (Scorpio did that with one of his pathetic 'mods') I mean i'm not even flaming here, i'm just stating the obvious.

No I don't blame vengeance, I like them somewhat, but Deezer (which looks like Deezire and sounds like Geezer) studios and their pathetic excuse of a staff, and their total lack of effort just SHINES here...

Seriously, you could have done something about these problems, you knew your staff happens to be a bunch of two-bit thieves, people with absolutely nothing better to do, not even learn how to model, rather they just simply convert work that people have worked HARD at, by HARD i mean they clicked their little fingers to the bone, only to have you rip them off.

Yes i'm referring to the whole mod team as YOU, because you Renardin who I have no lost all the little respect I had for have failed, miserably at that too, There is no way in hell you can escape it, you've fucked it up the patootie and it's gotten stuck, It's like you pissed your pants, everyone knows it's you who's done it, you don't want to admit it, but everyone knows it.

I mean for once I am seriously pissed off at you and the pathetic excuse of a staff you have, I'm not going to flame reborn, oh now, i'm going to flame you and what you stand for (You stand for your little attempt at an studio, of thieves it seems) Now I have nothing against a few people there, particullary those working on Vengenace and Genocide (And who I have Respect for, get it R-E-S-P-E-C-T, I believe Aretha Franklin made a song about it, and you know what, You got none Renardin.) who only donated a few models, the rest of you suck more than a black hole.

And a black hole could suck a planet through a garden hose.

To sum it up, You've failed.

I mean i've thought Reborn failed, your ideas, models, and mod, and your studio logo ... But not ALL, every last little bit of anything you had, has totally failed like a Pentium 2 trying to run Doom 3, it just doesn't work any more.

You've gotten off on excuses, but there is none for this, not a single excuse that would get you Pity, Acceptance, or even a "We accept your apologie".

I've probably managed to piss of the last few Reborn fanboys you have.

But this is the only rant of a post i've made towards you and your sluggish work since the last reborn Release.

I'm not just some random bashing Idiot, or an Aircraftkiller asslicker, I actually disagree with him on most things, take pleasure in correcting him and such, and i'm not a rabid RenAlert fanboy, I only downloaded it 993. yesterday.

What I am is a pissed off person.

Why? You stole, Not only did you steal from talented people, you stole from talented people who did it for free, only to have you steal it.

And you know whats worse...

Quote: I am as good as nightcrawler now... rofl

You laughed about it...

My rants over, go ahead Renardin, call me whatever you want, I met even get called a I-ACK-ey if i'm lucky.

Point made.

(Funny, a week after you posted this thread, Ak and Me actually talked about it probably being stolen work, turns out we were right.)
