Home pc: P4 2.8GHz 512MB RDRAM PC800 XP Pro

Server PC's:

PC1 P4 2.8GHz 1GB DDR3200 W2K3

PC2 P4 2.8GHz 1GB DDR3200 W2K3

PC3 P4 2.8GHz 1GB DDR3200 W2K

On all of them the SSC just 'stops responding' when you hit the 'go online' button. Tried different ports and stuff but no worked
