IceSword7flaw932.....u dumb fucks have no life

OMG ITS SNIPBRAVO!

Oh dear...

Laugh? I nearly passed my cigarettes around.

So let me get this straight, you got banned for throwing 30 or so timed c4, utilising the keyboard shortcut? What's the tactical advantage there? Proxy c4 I can understand though.

I've had tanks suddenly go "pop" and I'm sat just outside the base waving my repair gun about. I then also got a barracking for not c4 ing a few people...

Btw, is there any way that people can watch games? I'm sure it could be done on ra2, though I never tried. I'd really like to see this, when it eventually happens
