BlazerAlkalineThis game is not worth having its own anticheat system becuae of all the other crap that outs thier like server exploits.

Ya you kick/ban somone, they crash your server how nice is that :rolleyes:
screw it mang, its not worth it anymore...

Then you are promoting terrorism by letting them get their way. I would rather my server be down for a week of DDOS than to let cheaters run rampant ruining everyones game.

Blazer, dont even compare a cheater in renegade to terrorists. my god.
