Exactly, I have never attempted to bypass RenGuard (I am clueless when it comes to programming, as I've said many times) and very rarely cheat, and only then to piss off a certain group of people.

PermaGrin, if you want me to have you banned from all legitimate RA servers, sure... It's perfectly acceptable to use it, but be prepared to face the consequences. I knew what would, and will, happen if I cheated and I don't really give a damn. I got what I wanted from pissing off BC and that's why I did it.
