I think everyone here all have valid points but I think what Zunnie is trying to say is.

As long as there are servers that don't run renguard people will never download it (or just run it) to play on a server that runs renguard.

I just wished that everyone just ran it because if you have it running it doesn't stop you from playing in normal servers so when you changed over to a rengaured server then there would be no problems cos you are already running it.

Please Please Please install and run renguard. This would solve so many of the problems that occur. For this reason I tend to only play in Renguarded server such as TFW, WNx and the FanMaps servers.

Tilly
