Ever heard of remote C4? It would be easy to stop a rush.

Also. It all depends on how much the starting credits are. Be they 0, it would be kinda hard to get 2 apcs full of hotwires. Be they higher say, 200 or 400. It would be even easier to stop the rush.

As I said before, it's all about TEAMWORK. After all Multiplayer is meant to be a TEAM game.
