OMGZ!! Your right, I just looked at my box and it says C&C, not R&R.

No really. Wouldnt GDI have and unfair advantage with homing rockets?

GDI

Mammy rockets = short range

Gunner, Rocket Officer, Mrls = long range

not to mention the Mrls fires a salvo of 6 rockets

Nod

Stealth Tank, Recon Bike = mid range

Rocket Officer = long range

Then of couse the apcahe and orca rockets themselves, which for them atleast is balanced.
