DarkDemin and I had an idea this afternoon about making a movie just like cyberpunk's, but instead of supporting cheats, we're supporting RenGuard. This short, low quality, and somewhat queer movie is meant to show you some of the destructive effects of cheating and cheaters themselves. The movie depicts DarkDemin and xptek using various cheats to gain an unfair advantage of what would be a normal game if the rest of us were unaware. We played the game like normal, attempting base kill and attacking each other. The results of our efforts is the movie that DarkDemin put together with his footage that he captured from using Fraps. Enjoy and download RenGuard.
