Aircraftkiller You are biased, and you have cheated before, in addition to spreading wallhacks\objects modifications. Crimson knows this and I don't hate to say it but you're not going to be a moderator here, so go back to BC where you belong...

BHS never said there was something wrong with cheating. Cheating is perfectly acceptable as another way to play the game in servers that allow it. However, you people made the mistake to say "we have no cheaters in our servers" and you got ownt for it... Maybe you should have actually done something about it before making dumbass comments.

Yeah, it makes sense. Think about it, it'll come to ya...

I may not like you, but I harbor no hatred for your modification. I have never spread any cheats; however, I did send them to crimson/blazer, so that they could better prepare their servers. I know I can't win because this "voting" process is most likely rigged anyway, but I figured I'd give it a shot so I can have a good laugh.

And if BHS doesn't think there's anything wrong with cheating...Then why does RenGuard even exist? Now I see why you don't speak for BHS anymore.
