Subject: IE Problem
Posted by cheesesoda on Fri, 27 Aug 2004 13:21:51 GMT

I know, I know, IE is worthless, but my work computer has it and I can't do anything about it.

Problem:

I can't connect to most sites. I've only been able to connect to a few...here are the ones I can connect to:

http://www.ugin.net
http://www.renegadeforums.com (obviously)

Ones I CANNOT connect to:

http://www.comcast.net
http://www.google.com
http://www.n00bstories.com
http://www.absopure.com
http://www.fr0zenhost.com
http://www.wouldyouhitthis.com
http://www.35mb.com

I'm guessing that I won't be able to connect to many at all.
