WeirdoAnyway's I'm afraid that by giving the ramjet a limit of 2, or 3. It might get less powerfull then the 500 sniper against infantry, wich is basicly the only thing I have against this idea.

That's the point. The 500 sniper is the real sniper, and should be the main anti-infantry unit. Right now Havocs and Sakuras are anti-everything x4. Bringing it down to 1 would balance things a lot more. Or maybe 2 shots, but with a slower rate of fire.
