AlkalineHaving cheaters that have been banned rejoin the server with new ip worth it? (cdkey banning v.s ip banning)

Thats not possible because we run RenGuard there will be NO cheaters.
And, in addition to that RenGuard supports Serial Banning so thats not an argument neither.

NaamloosA lot of people, like me, can't play on gay spy.

We get kicked the minute we join a game thanks to EA.

And this is another Reason GSA is actually aka GaySpyArcade.
People bought the game and they just cant play on GSA lol. How gay is that?
Suppose WOL is no more sometime soon these people cant play anymore at all.
Because the serials are not registered with GaySpy database.

Alkalinel love my =[UN]= tag

Sure a tag is nice. Its not the tag that causes problems.

Its a pain in my ass to kick these fuckers whenever they break the rules.
And in addition to this kicking these fuckers is ALWAYS a "quick kick" , they can rejoin the same minute as they were kicked. GAY!!!

And: The long names should be limited to for example 15 characters provided that they can be accessed on the keyboard without having to type special Alt+<number> codes.
