i had 1.7 i think, then I updated to 1.9.1 at first i didn;t realize it but like 5 mins in to the game as a SBH i realized that I was hearing every one reloading. It was walls_flying I was on top of the hill in the middle, no one next to me and like every 4-10 seconds i would hear a reload sound. I wasn't reloading so i guess I was hearing ether my teem or everyone in the game. When they reload I hear it... Anyone have the same problem or a solution?
