Aircraftkiller! don't clean often, but when I do it all looks nice and tidy until I don't feel like cleaning again...

I have the exact same mousepad. And on my other computer I have the exact same mouse. and in my room I have the exact same dam speakers!!!!!!!!!!!!!!

I dont know where the mousepads from though.. I got it from my friend rebecca who everone says is my girlfriend.

We have a home office so I will post all the pics.

Heres my server(left), moms computer/brothers/mine(never use it) (right).

Note how I only have one monitor. I got my parents to buy me a \$100 switch so I could have my server and my moms comp on one switch.

Heres my dads comp. The router and modem are also under there.

Heres my dads monitor.

Heres my dads laptop.

And heres the beast. This was our first computer. Its an old windows 95. I tried to reformat it about 3 months ago. I didn't get the cd rom driver backed up though. I cant reinstall anythign so now its just sitting there. Sorry about the pics for this one. my brother has models all over the front of this thing.
