MadtoneBad head render, you'll have to re-render that.

Looks great though, only part i dislike is those extrudes from the shoes, like straps or something. They look out of place an looks like they could snap off at any time.

Can't wait to see this guy skinned.

Yes it is a very very bad render, I put some omni lights in pretty bad positions and used a quik render.

Seeing no one likes those things coming off of the feet I will probably replace them. Does anyone have any ideas of what to add to this model?
