That bites. It sounds like a real challenge. Having to drive those tractors around avoiding the powerful chinese defences and swooping in quickly to get the job done. I mean Warcraft 3 has the mission where you need to kill 100 civilians. And how much trouble did they get into. But then again that religious group got angry at the golden temple level in Hitman 2. But still I am sure alot of chinese get butchered in the US and GLA campains as it is.
