Braces suck, I had mine for 2 years and got them off THE DAY BEFORE THANKSGIVING, I was so happy I got to eat a whole lot of food and none of it got stuck Braces are a pain in the ass, takes about 2 minutes to properly brush your teeth, and it hurts when they change the wire or bands to move stuff around some more. I currently have a retainer which I only where at night, and there's some part on the retainer that's jabbing into the top of my mouth, it hurts like a mother f***er. My retainer also smells like I haven't brushed my teeth in a month, anyone know how to fix that, don't tell me I have to brush my retainer with my tooth brush, that would be wierd. Do I have to like soak it in mouthwash or something?
