Yes, but you're 20ish you should be mature enough recognize a dead horse(Reborn) and let it drop. Everybody except Renardin and his acolytes has basically realized that Reborn is not currently worth their time or bandwidth. You and others have repeatedly shown that they have serious content and software issues to deal with before they can be taken seriously.

Were I in the Reborn mod I would have kicked Renardin to the curb months ago as he is apparently the major stumbling block in their path. It(Reborn) has potential to rival RenAlert in cool factor, and possibly popularity, if they can get their ducks in a row and resolves their issues.

Now I won't ask you guys to make up, but let's drop the animosity and have done with it.

\*Dear sweet Jesus, am I full of animal analogies tonight or what? :rolleyes:
