zunnieNaamloosIt DOES drop the FPS a little.Regardless of wether you have a kick-ass pc with a stable 75+ FPS , when the SERVER has 10SFPS your game will 'feel like' 10 fps as well (even if you have 75+ fps showing).  
[zunnie]

Incorrect. If the SFPS is very low, you'll experience lag, not FPS (invisible) drops. I've played in a non-dedicated server and the host has had 10 fps, yet Renegade still feels very fast. I've also experienced the same in dedicated servers.
