SioXerNicEXdeath7Just add some crates around it and some pipes then he can add a dark colored alpha channel on the ground around it.

It looks awesome. Did you make those textures?

no didnt make em... but i did the uvw.... its made up by two textures... both from the game emperor: battle for dune
and roger about the crates and pipes... but interior... NOT ME

I highly suggest you unwrap it. It's easy and makes it a hell of a lot better.
