## Subject: Explanation?
Posted by mac on Wed, 13 Oct 2004 09:03:22 GMT

I don't have logs in a human readable format.. Crimson needs to do the log viewer, among other things

From what I can tell, it seems that RenGuard SSC lagged a bit.. eventually, the should have been kicked, if it's connected to the network.. (try the Server list)

brenbot 1.36 greatly enhanced stability.. I have not seen minute-long lags on my servers since overhauling the renguard code.. it's due to be released very soon now..
