Beta Release of RenRevolver

I am releasing my work as of now, in hopes of some people wanting to join me and help with the mod. Its playable, but not very good yet.

play maps:

Desert Town, Test1 and Bridge.

Neither are real maps, just ones i put together for this release. Also health settings arent "True" yet. Like the bridges fall in three shots....

<http://www.dr-oblivion.com/RenRev.exe> 73.8 Mb

If you have problems with myfile copier, then simply Copy all the files in your Renegade Dir (Not the folders) and paste them in your RenRevolver Folder.
