This thread will contain links and content of tutorials and helpful hints for modding C&C Renegade.
The thread is locked because I wish it to only contain the useful info, and not be dilluted by flames and discussions.
Let me know if any of the links become stale or incorrect, and post links to ones you think should be added HERE.
You can contac me via diferent mediums see here
or send me a PN via the board

This first post will contain all of the links to external tutorials, and anything that can be displayed here locally (HTML format) will follow.

One of the largest and best Tutorial recources in the Web for Renegade, you should find most what you are searching for here:
