Sniper's range is pretty much unlimited and instant in Renegade.

No skill required to shoot down aircraft with a n00b cannon, just 5 shots...

The aircraft have very little armour and are pretty much doomed when there are two n00bcannoners sitting around taking pop shots at aircraft where ever they may fly.

They can hide in a civilian structure or inside one of their own buildings when the aircraft get too close and go inside to refill if they happen to take damage from your spray of bullets.

It's lame.
