Calm down ACK. Jesus.

I think what he's trying to say, and I agree with him to some point, some things shouldn't be changed. Renegade has been out for almost 3 years now and it's really going to screw with some people if you change significant things now. For example, getting on buildings have become tactics, and if the other team cannot respond to these tactics, that is their loss of skill or knowledge to do so. I think it would be very wrong to take these type of things out.
