Hello.... I have been working on this texture for a few days now, its not quite finished, and I'm trying to make sure it's not mistakeable as concrete - I want it to have a distinctly metallic appearance. Tell me what you think, and if you find it to be concrete-like, let me know what suggestions you have for improving it. Keep in mind that this texture is incomplete, and that there is much detail to be added, but that the metal texture itself is basically finished.
